*Due to the COVID-19 pandemic, the data as reported may appear anomalous and represent exogenous factors beyond the agency's control. The impact on agency performance has not been fully evaluated at this time.

Sources: Agency submitted data from Annual Energy Data Report, EISA 432 Compliance Tracking System, Federal Real Property Profile, Federal Automotive Statistical Tool, SAM.GOV

Btu = British thermal units GSF = Gross square foot (or feet) ESPC = Energy Savings Performance Contracts UESC = Utility Energy Savings Contracts ECM = efficiency/conservation measure AFV = alternative fuel vehicle GHG = greenhouse gas na = not available

Greenhouse Gas Emissions: Agencies' GHG emission reductions compared to FY 2008 base year by scope and end-use sector will be tracked and reported as an indicator on the Scorecard along with direct GHG emissions intensity from energy use in all facilities.

Facility Energy Efficiency: Agencies are assessed on meeting or exceeding the statutory goal of a 30% reduction in Btu/GSF from a 2003 baseline and demonstrating a reduction from the prior year.

Agency achieved <u>></u> 30% reduction compared to 2003	Agency achieved <u>></u> 30% reduction compared to 2003	Agency did not achieve a 30% reduction in energy
<u>AND</u> achieved a reduction in energy intensity from	<u>OR</u> achieved a reduction in energy intensity from the	intensity compared to 2003 AND did not achieve a
the prior year.	prior year.	reduction in energy intensity from the prior year.

Identification of Efficiency Measures/Investment: Agencies are assessed on covered facility evaluations. OMB will also track percentage of efficiency investment executed through performance contracts, potential investment in identified ECMs and reported project investment in covered facilities.

0 1	, 1	
>90% of facility evaluations completed/updated	>75% facility evaluations completed/updated within	<75% of facility evaluations completed/updated
within last 4 years AND agency awarded	last 4 years <u>OR</u> agency awarded performance	within last 4 years & agency did not award any
performance contracts in the fiscal year.	contracts in the fiscal year.	performance contracts in the fiscal year.

Renewable Energy: Agencies are assessed on meeting or exceeding 7.5% renewable electricity use annually. OMB will also track non-electric RE use.

Renewable electricity comprised <a>7.5% of total	Renewable electricity combined with non-electric	Renewable electricity combined_with non-electric
electricity use.	renewable energy sources (thermal + mechanical)	renewable energy sources (thermal + mechanical)
	comprised <u>></u> 7.5% of total electricity use.	comprised <7.5% of total electricity use.

Water Efficiency: Agencies are assessed on continued reductions in potable water use intensity and a 20% reduction from its 2007 baseline.

Agency achieved <u>></u> 20% reduction in potable water	Agency achieved <a>20% reduction compared to 2007	Agency did not achieve a 20% reduction compared to
use intensity compared to 2007 AND reduced its	<u>OR</u> achieved a reduction in potable water intensity	2007 AND did not reduce potable water use intensity
potable water use intensity from the prior year.	from the prior year.	from the prior year.

High-Performance Sustainable Buildings: Agencies are assessed on the number and square footage of owned federal buildings that are sustainable buildings and are tracked in the Federal Real Property Profile (FRPP).

At least 15% of agency owned buildings or GSF meet	At least 15% of agency owned buildings or GSF meet	Less than 15% of agency's inventory meets
sustainable building criteria and the agency	sustainable building criteria OR the agency increased	sustainable building criteria AND the agency
increased percentage of sustainable buildings or GSF	percentage of sustainable buildings or GSF from the	decreased percentage of sustainable buildings or GSF
from the prior year.	prior year.	from the prior year.

Fleet Management: Agencies are assessed on meeting or exceeding a 20% reduction in petroleum use compared to 2005 and demonstrating a reduction from the prior year. OMB will also track alternative fuel use percentage, fleet acquisitions, and installed EV charging ports.

Agency achieved <a>20% reduction in petroleum use	Agency achieved <a>20% reduction in petroleum use	Agency did not achieve a 20% reduction in petroleum
compared to 2005 AND achieved a reduction in	compared to 2005 OR achieved a reduction in	use compared to 2005 AND did not achieve a
petroleum use from prior year.	petroleum use from prior year.	reduction in petroleum use from prior year.

Sustainable Acquisition: Agencies are assessed on the change from prior year performance of the percentage of contract actions and dollar value of sustainable acquisitions as reported in the FPDS, which include the mandatory clauses for the purchase of biobased, energy-efficient, recycled content and other sustainable attributes.

Agency increased percentage of sustainable	Agency increased percentage of sustainable	Agency's percentage of sustainable acquisitions from
acquisitions of total actions (both number of actions	acquisitions of total actions (either number of actions	total actions (number of actions & dollar value)
& dollar value) from prior year percentage levels.	or dollar value) from prior year percentage levels.	remained the same or decreased from prior year.
